I've helped manage and worked in so many different bat colonies that I can pass on this one too. But, thanks for thinking of us. ;)

Hi all,

Happy New Year!

I responded to Brian separately, but it doesn't look like I'll be able to participate in the the bat colony visit. If someone else needs my spot and has the current TB test documentation, please speak up. Chris & Jon, you'll need to provide the letters re training, as Brian has described.

See you there,

Jonna

Hi guys,

Our approvals to get on the campus and into the laboratory buildings/corridors came through, so we're all set. Billy, are you going to make the trip? I haven't heard for sure if you'll be joining us.

I talked with Towner last week about the trip and things are falling into place. The visit to the bat colony for 3 folks should be feasible. But we'll need a letter on UCD letterhead saying that we are familiar with the PAPR technology and it's use. You'll need the TB test results as well. So for the bat colony visit it looks like it will be Jonna, Jon, and Chris as you were the first to respond. I'll let you guys duke it out or rochambeau if you want to

change up those visitors. :)

Also the visit to the high containment corridor (outer cold side access area of the BSL4 and BSL3E labs) is in the works as well. That'll be limited to 5 of us, so that's probably easy, I'll not go, since I spent a better part of 8 years walking that hallway and deeper within.

Here is link to the Emory Conference Center Inn. I'd recommend making a reservation now, just in case they run out of government rate rooms. It's just across the street from CDC and a 5-10 min walk to the main gate. And walking to the new restaurants and shops right there as well.

Hope everyone has a good week!
